

POINT-BASED AND POINT-RANGE RUBRICS IN ULTRA COURSES

We are excited to add point-based and point-range rubrics to Learn Ultra courses. Point-based and point-range rubrics provide instructors the flexibility that is expected for a variety of grading procedures and use cases. Instructors may customize rubrics with different point scales to support various pedagogical approaches and instructional practices. Likewise, faculty may opt to use decimals, organize columns with points or points ranges ascending or descending, and utilize total points that sum up to 99,999.00.
