

WORKING AROUND THE GRADE USER ACTIVITY ERROR

THE ISSUE

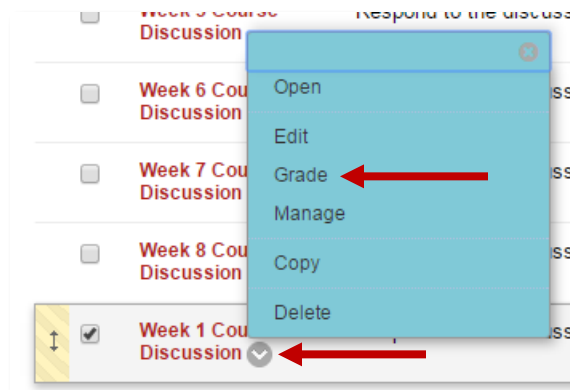

When attempting to grade student discussion contributions through the Grade User Activity option for any student in the grade center, instructors have reported an error. Blackboard engineers are currently working to resolve the issue. Discussions may still be graded and no student work is lost because of the error.

THE WORKAROUND

1. Navigate to the **Discussions** area in your Blackboard course.

2. Mouse over the Discussion Board you need to grade and click on the **Action Link**.
3. A contextual menu will appear. Select the **Grade** option.

4. Click on **Grade** for the first student in the list.
5. The following page will display that students' discussion contributions and allow for grades to be entered.
